Education

Vishnu Institute of Technology

B.Tech in Computer Science and Engineering (Artificial Intelligence & Data Science)

Aug 2023 – Present

CGPA: **9.27 (Till Date)**

Narayana Junior College

Intermediate (MPC)

Jun 2021 – Apr 2023

Percentage: **96.4%**

Technical Skills

Programming: Java, Python, SQL
Databases: MySQL, MongoDB
Backend & APIs: Flask, FastAPI, REST APIs
Data Structures & Algorithms: Data Structures, Algorithms
Web Development: HTML, CSS, JavaScript, React.js
Computer Science: OOP, DBMS, Operating Systems, Computer Networks
AI & GenAI: LLM Applications, Prompt Engineering, Google Gemini API
Tools: Git, GitHub, Docker, GCP, VS Code

Experience

Remote Live Project Work Experience – Full Stack Engineer

May 2026 – Jul 2026

ZeTheta Algorithms Private Limited

Remote

- Completed 4 full-stack & cloud engineering projects in the BFSI domain, including a multi-step loan application frontend and an API integration layer connecting an ERP system with a financial analytics platform.
- Contributed to an event-driven notification engine using Kafka and RabbitMQ, supporting 25+ event types across 5+ delivery channels, and a multi-region disaster recovery architecture for a payment systems platform.

Google Cloud Generative AI Intern

May 2026 – Jul 2026

SmartBridge

Remote

- Built 2+ LLM-powered applications during a 3-month Generative AI internship, applying prompt engineering and API integration techniques while consistently meeting 10+ weekly milestone deliverables.
- Engineered a Personal Networking Assistant in Python using the Google Gemini API to automate contact suggestions and follow-up reminders, streamlining outreach for 50+ professional relationships and cutting manual follow-up time by 40%.

Projects

LendSwift – Full Stack Loan Application Platform

React, TypeScript, Tailwind CSS

[\[GitHub\]](#)

- Developed a production-grade, 8-step multi-step loan application wizard with real-time validation across 45+ rules defined via Zod schemas.
- Built a reusable component library (8 components) including digital signature capture, drag-and-drop KYC uploads, and file validation.
- Implemented 3 custom React hooks for auto-save, pin-code lookup, and real-time field verification to prevent data loss mid-application.

Personalized Networking Assistant – AI Conversation Starter Generator

Python, FastAPI, Streamlit, Hugging Face (GPT-2)

[\[GitHub\]](#)

- Created an AI-powered conversation starter generator that extracts key themes from event descriptions and generates tailored icebreakers using GPT-2.
- Achieved reliable output correctness through 40 unit tests covering theme analysis, fact-checking, and API routes, served via a FastAPI backend and Streamlit UI.

ATS-Project – Smart ATS Resume Analyzer

Python, Flask, Google Gemini API

[\[GitHub\]](#)

- Developed a Flask-based ATS resume analyzer that returns a 0–100 ATS compatibility score by comparing an uploaded resume against a job description using Google Gemini AI.
- Engineered a resume-parsing pipeline (PyPDF2) and REST API returning matching/missing skills and improvement suggestions alongside the ATS score.
- Designed a responsive HTML/CSS/JavaScript frontend with asynchronous API calls and loading-state feedback for a smooth user experience.

Certifications

[\[View All\]](#)

- Tata GenAI Powered Data Analytics Job Simulation** — Forage (2026)
- Generative AI Certification** — Datavalley India Pvt. Ltd. (2026)
- Remote Live Project Work Experience (Full Stack Engineer)** — ZeTheta Algorithms Private Limited (2026)
- Full Stack Development – MERN** — SmartBridge (2025)
